

FLYING HIGH

SITA Smart Path
meets the Cloud

Fast Delivery and Real-Time Agility

- Less time between development and production.
- Latest features and updates on demand.
- No wasting time updating clients, servers, or workstations.

Elevated security

- High resiliency built in.
- Meet industry standards for security, verification, access, and data.
- Benefit from high levels of cloud provider investment.

Operational Efficiency

- SITA provides 24/7 integrated local and global support.
- Airport support team can focus on other activities. Airports can switch focus to premium customer services.

Cost efficiency

- Reduced upfront investment in hardware and infrastructure.
- Pay as you go with Software as a Service (SaaS) subscription-based model.
- Convert capital expenditure into operational expenditure.

Customizable Integration

- APIs to tailor solutions to your needs.
- Easily integrate Cloud with a broad ecosystem of applications.
- Integrate with any existing third-party solutions.

Guaranteed flexibility and scalability

- Not constrained by hardware capacity.
- Start small and easily scale up to your airport's demands.

SITA Smart Path is set to take your business even further, faster through seamless integration with the Cloud.

Moving to the Cloud amplifies Smart Path's capabilities. Bringing additional benefits to airports, airlines, and passengers. All over the world.

WHY THE CLOUD IS KEY

SITA Smart Path delivers six simple, compelling benefits for the aviation industry: fast delivery; cost-efficiency; higher security; tailored APIs; smoother operations; no limits on your growth.

The Cloud is here to transform your business. With our dedicated team of experts, SITA will create the right solution for you. Learn more about SITA's Cloud Solution or ask for a free consultation. Talk to your local Account Team today. **We're ready for take-off when you are.**
